AMENDMENTS TO THE CLAIMS

In the Claims, please make the following amendments:

1-26. (Cancelled)

27. (New) A method of enabling a mobile station in a wireless network to originate or receive a call during a mobile terminating location request, comprising:

initiating a mobile terminating location request; and

sending a network command to the mobile station during processing of the mobile terminating location request.

28. (New) A method as set forth in claim 27, where sending a network command to the mobile station comprises sending a network command to the mobile station immediately following the mobile terminating location request.

29. (New) A method as set forth in claim 27, where sending a network command to the mobile comprises sending a direct transfer application part message or a radio resource location protocol request to the mobile station.

30. (New) A method of enabling a mobile station in a wireless network to originate or receive a call during a mobile terminating location request, comprising:
after a mobile terminating location request has been initiated, sending a network command to the mobile station during processing of the mobile terminating location request.

31. (New) A method as set forth in claim 30, where sending a network command comprises sending a direct transfer application part message or a radio resource location protocol request.
32. (New) An apparatus for enabling a mobile station in a wireless network to originate or receive a call during a mobile terminating location request, comprising:
- means for initiating a mobile terminating location request; and
 - means for sending a network command to the mobile station during processing of the mobile terminating location request.
33. (New) An apparatus as set forth in claim 32, where the means for sending a network command to the mobile station comprises means for sending a network command to the mobile station immediately following the mobile terminating location request.
34. (New) An apparatus as set forth in claim 32, where the means for sending a network command to the mobile comprises means for sending a direct transfer application part message or a radio resource location protocol request to the mobile station.
35. (New) An apparatus for enabling a mobile station in a wireless network to originate or receive a call during a mobile terminating location request, comprising:
- means for detecting a mobile terminating location request; and
 - means for sending a network command to the mobile station during processing of the mobile terminating location request.
